Demo Day

PortMiami | September 9, 2025 | Invite-Only

LIVE DEMONSTRATIONS. REAL SOLUTIONS. MISSION-READY INNOVATIONS.

eMerge National Security Demo Day showcases mission-ready, dual-use critical technologies startups through live, scenario-based demonstrations. This exclusive event connects top innovators directly with government buyers and investors focused on deploying solutions for national security, public safety, and the private sector.

WHERE GOVERNMENT, INDUSTRY, AND INNOVATORS CONNECT TO DEPLOY THE TECHNOLOGIES THAT SECURE OUR FUTURE.

WHY ATTEND

- **For Government & Public Safety:** Evaluate and source deployable technologies aligned to mission requirements.
- **For Investors:** Access to vetted dual-use critical tech startups ready to scale
- **For Startups:** Showcase solutions directly to decision-makers and funding partners
- **For Community:** Strengthen security, resilience, and economic development

HIGHLIGHTS

- Live, scenario-based technology demonstrations
- Curated selection of dual-use startups
- Government, defense, and law enforcement buyers in attendance
- Mission-driven investors and VCs
- Networking with public-private partners

WHO SHOULD PARTICIPATE?

- Federal, state, and municipal buyers
- National Security and Defense procurement teams
- Dual-Use technology startups & innovators
- National security-focused investors

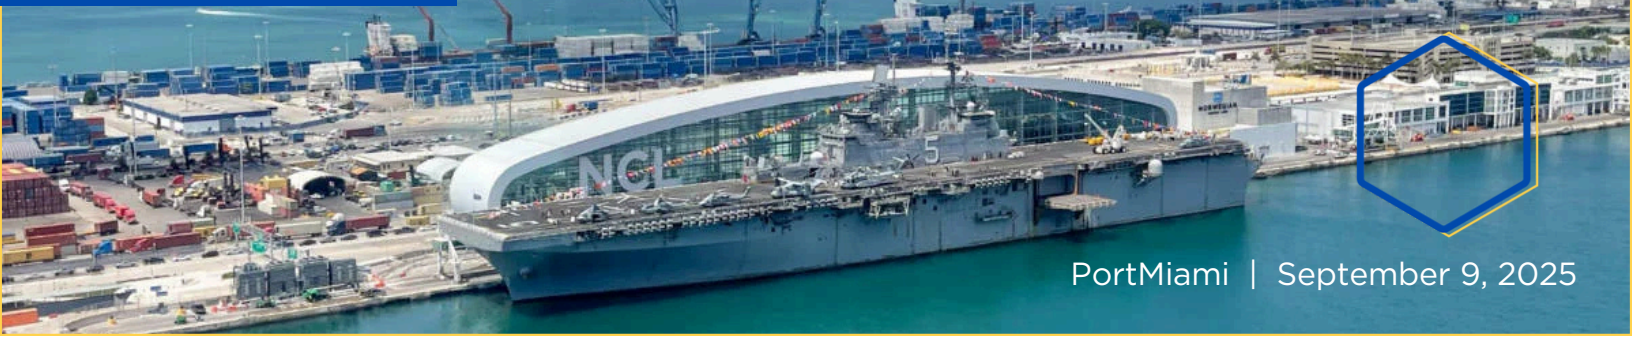

eMerge Americas is a strategic convener and catalyst for innovation, bringing together global enterprises, startups, investors, and government leaders to accelerate advancements in AI, Finance, Health, and National Security. Through year-round programming and its annual global tech conference + expo in Miami, eMerge Americas connects capital, talent, and ideas to drive impactful progress, strengthen industries, and bring transformative and emerging technologies to market.

**NATIONAL
SECURITY**

Demo Day

PortMiami | September 9, 2025

OBJECTIVES

- Highlight Miami's leadership in supporting national security innovation.
- Demonstrate mission-ready solutions in a real port environment.
- Foster meaningful engagement between innovators and decision-makers.
- Empower talent retention of critical national security applications.

TARGETED TECH DEMOS

- **HavocAI:** develops ultra-low-cost autonomous surface vessels (ASVs) with collaborative autonomy for maritime operations.
- **Vatn Systems:** swarming autonomous underwater vehicles (AUVs) with advanced navigation.
- **Archaius:** electronic-warfare navigation by developing GPS-denied positioning, protection, and seeker systems.
- **Loko AI:** AI platform transforming complex operation into real-time, predictive insight.
- **Flymotion:** technology firm delivering end-to-end unmanned systems, system integration, and training to defense, public safety & gov.
- **Bedrock:** geophysical surveying via AUVs and software for high-resolution seafloor mapping.
- **Firestorm:** mission-adaptable, 3D-printed unmanned aerial systems (UAS).
- **Neros Technologies:** designs, manufactures, and deploys high-performance, U.S.-built unmanned aerial systems.
- **Anduril:** autonomous land, sea, and air defense systems powered by its AI-driven platform.
- **Saronic:** intelligent autonomous surface vessels (ASVs) to extend naval capabilities through situational awareness and survivability.
